Full stack web developer leveraging background in engineering and front-end experience to apply problem solving skills and technical knowledge to create web application solutions. Strengths in communication, collaboration, and building components from ideation to execution.

EXPERIENCE

Software Engineer
May 2022 - March 2023
Olea Edge Analytics

- Developed and implemented features and reusable components such as a sharing modal, drag and drop functionality, responsive layouts, feature flagging, etc.
- Assisted in trouble shooting, resolving issues, and writing unit tests.
- Provided feedback in code reviews while also fostering an environment of open communication and continued education with other team members.
- Collaborated with cross functional teams such as back-end team members, customer experience leads, and product managers to define deliverables and associated timeline estimations.
- Participated in sprint planning, task decomposition, and daily stand ups to ensure deliverables were being met.

Environmental Specialist
Jan 2016 - May 2022
NextEra Energy

- Managed environmental due diligence associated with upstream wells prior to acquisition.
- Coordinated remediation efforts to ensure that environmental releases were delineated, remediated, and closed out with the necessary governmental entities.
- Assisted in building out software solution -- Maximo and OneEx -- to assist with tracking and closing out of submitted work orders.
